DETAILED ACTION

The indicated allowability of claims 1-21 is withdrawn in view of the newly discovered reference to Simpson (US 4,272,662). Rejections based on the newly cited reference follow.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 5, 6 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Simpson (US 4,272,662). The reference discloses an apparatus for a conductive contact having, *inter alia*, a housing, a dielectric actuator 136 and a spring contact 46. See figures 8 and 9.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4, 7 and 9-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Simpson (US 4,272,662). The reference fails to disclose the device being a

headset or the device be used in a charging environment. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have applied to teachings to a headset recharging system, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
